

## Environmental Policy

NDI is committed to minimizing its environmental impact of its activities on the environment.

The key points to our strategy to achieve this are:

### Business:

- Re-word and promote our business ethos to include how we consider the environmental impact on how we conduct business.
- Work with Clients and Markets (existing and new) to explore more greener/sustainable products and options as we all transition to more sustainable methods of business (renewable energies/advanced technologies).
- Compensate our carbon footprint by funding climate projects to reduce Carbon and become a Climate Positive Workforce.

### Office and staff:

- Improve our recycling and reduce our office waste.
- Reduce the use of office supplies and source sustainable supplies where possible.
- Reduce energy usage.
- Encourage greener commuting to work promoting the cycle to work scheme.
- Encourage and challenge staff to explore ways to reduce their personal carbon impact.
